📋 SUMMARY

Undergraduate Software Engineering student specializing in Full-Stack Development and Artificial Intelligence. Strong foundation in software engineering principles, modern web technologies, and problem-solving. Motivated to learn, adapt, and contribute to real-world software solutions in a professional development environment.

🎓 EDUCATION

LNBTI, *BSc (Hons) in Software Engineering*

2023 – 2027

LNBTI Japanese IT University

- Focused on full-stack development and AI/ML technologies.
- Actively contributing to open-source projects to enhance coding and problem-solving skills.

Lumbini College, *Advance Level, Commerce Stream*

2017 – 2020 | Colombo 05

- Advanced Level Commerce stream with a focus on accounting, economics, and business studies.
- Developed a strong understanding of business operations, finance, and economic principles.

🧠 SKILLS

Full-Stack — MERN(MongoDB,Express.js,React,Node.js), **AI & Machine Learning** — (Python, Machine Learning Fundamentals, Deep Learning (ANN, CNN), TensorFlow, NLP Basics, LLM Fundamentals, LangChain Basics), **Programming** — (Python, JavaScript, Java, C#, C++), **Frontend Development** — (React, HTML, CSS, JavaScript, Tailwind CSS), **Backend Developer** — (Node.js, Flask, PHP), **Database Administrator (DBA)** — (MySQL, PostgreSQL, MongoDB), **Leadership & Team** — Communication skills

🌐 LANGUAGES

English

Sinhala

PROJECTS

ShoeMart, *Smart Shoe Retail Management System*

09/2025 – Present

Tech Stack: React, Node.js, Express.js, Flask (AI), SQL Server, JWT, Generative AI

- Developed a full-stack shoe retail system supporting online and in-store sales with real-time inventory synchronization
- Implemented WhatsApp-based ordering, delivery tracking, and admin dashboards with secure JWT authentication
- Built a Flask-based AI service for customer chatbot support and automatic product name & description generation

Tour Nexus,

All-in-One Tourist Support System for Sri Lanka 

Tech Stack: React, Node.js, Express.js, SQL Server, JWT, AI/ML

- Developed a full-stack, web-based all-in-one tourism support system connecting tourists with hotels, tour guides, and vehicle rental services.
- Implemented secure authentication, booking management, real-time chat, and payment workflows with role-based access control.
- Built an AI-powered trip planning service to generate personalized itineraries based on user preferences, budget, and duration.
